Day 39 - Project Session

Announcements

- Midterm 2 graded, please review (esp. for project check-in)
- HW 7 and 8 remaining
- Final project due 4/28 at midnight (D2L)
 - Turn in everything; notebook, code, report, figures, etc.

No Class Friday

- Caballero in DEN (2 hours behind)
- No class, no office hours
- Can meet by appointment Friday, Saturday, or Sunday.

The Bullshit Continues

- Cuts to education, research, healthcare, and social services
- Attacks on academic freedom and free speech
- Severe budget cuts to public universities; increased tuition
- Vilification of international students and scholars

Resisting the Bullshit

From Wikipedia, the free encyclopedia

For the amendment on the New York State ballot in 2024, see [2024 New York Proposal 1](#).

The **Equal Rights Amendment (ERA)** was a proposed amendment to the [United States Constitution](#) that would explicitly prohibit sex discrimination. It is not currently a part of the Constitution, though its [ratification](#) status has long been debated. It was written by [Alice Paul](#) and [Crystal Eastman](#) and first introduced in Congress in December 1923. With the rise of the [women's movement in the United States](#) during the 1960s, the ERA garnered increasing support, and, after being reintroduced by Representative [Martha Griffiths](#) in 1971, it was approved by the [U.S. House of Representatives](#) that year, and by the [U.S. Senate](#) in 1972, thus submitting the ERA to the [state legislatures](#) for ratification, as provided by [Article Five of the United States Constitution](#). A seven-year, 1979, deadline was included with the legislation by Congress. A simple majority of Congress later extended the deadline to 1982. Both deadlines passed with the ERA

This article is part of [a series](#) on the

Best Way to Use this Time

There's lots of y'all and one of me.

- Review the project rubric; ask questions about your work in the context of the rubric
- Physics or modeling questions take priority over coding/programming questions
- Research coding/programming questions, we can discuss approaches/sources
- Your writing for this project is important and will be evaluated

Your project does not need to be perfect; science rarely is.

Questions not worth asking

- How do I get a 4.0 on this?
 - Ans: Check the rubric and do your best
- Will this get a good grade?
 - Ans: Likely
- Can I just do ... ?
 - Ans: Unlikely
- How much more do I need to write?
 - Ans: Depends

Check the rubric and do your best. *Y'all's work has been good so far.*
